## CAPABILITIES OVERVIEW

COMPLIANCE JURISDICTIONAL INSPECTION SOLUTIONS

Insparisk provides proprietary software solutions developed to support all disciplines required in the inspection process. It is delivered via a scalable SaaS and a mobile based platform that allows for efficiently scheduled inspections, maintaining quality control and generating inspection reports instantaneously. You are able to access and have new insight into all of your inspections as they occur by leveraging our data capture and Digital Twin imaging technology that has been provided to many of the largest retail & commercial brands.
